

Housing Smart is a trading name of Newsome Vaughan LLP and has been specifically developed and set up in order to provide added value to our housing and property related clients. This enables Newsome Vaughan to provide a more complete service and ensuring that transactions are dealt with as quickly and as efficiently as possible. By retaining the asset management aspect of the transaction within the firm there are financial savings and time efficiencies that can be achieved that would not be available if those tasks were conducted by an external agency, as has been the historical position.

Housing Smart is managed by experienced staff who understand both the estate agency and the legal aspect of the transaction and therefore uniquely places them in a position being able to ensure that transactions are progressed as efficiently and quickly as possible, as a result clients are able to complete their transactions in a more expeditious manner.

Housing Smart is set up to deal with both large and small volume property transactions and asset management.

If you feel that this service could be of assistance or benefit to your organisation please do not hesitate to contact us and ask for one of the members of the Housing Smart Team.
